TOTAL 1993-94	See Below	

LB 719, as amended by AM2286, would designate the Natural Resources Commission as the agency responsible for scenic river corridor protection activities. Expenses incurred by the Commission would depend upon the extent of protection activities as determined by the Legislature. If the Commission's role is determined to be one of principally reacting to local efforts, expenditures could be variable and would occur only when agency action was required. If the Commission role is determined to be one of ongoing evaluation of rivers and streams, full-time staffing expenses as estimated in the agency response would be necessary

NATURAL RESOURCES COMMISSION: Concur.
