LB 713 changes provisions relating to the certification of state aid by the State Department of Education (NDE) beginning in 1998-99. The bill allows NDE to use data on general operating expenditures and school district receipts from the most recently available complete date year and have that date adjusted by the average annual change in each districts general fund operating expenses and actual receipts for the most recently complete data year and the two years immediately preceding the most recently completed year. In the final calculation of state aid, general fund operating expenses and actual receipts will be based upon data from the most recently available complete data year as is the current practice.

NDE may have one-time computer programming expenses in 1998-99 to do reprogramming related to the change in certifying state aid it is assumed any programming and workload increase related to the change in methodology for the initial certification of state aid can be handled with existing staff and resources of the agency.

DEPARTMENT OF EDUCATION: Concur with the Department of Education's analysis.
