LB 713 changes provisions relating to the certification of state aid by the State Department of Education (NDE) beginning in 1997-98. The bill allows NDE to use data on general operating expenditures and school district receipts from the school year immediately preceding the most recently available complete data year and have that data adjusted by the average annual change in each district's general fund operating expenses and actual receipts for the three years preceding the most recently complete data year. In the final calculation of state aid, general fund operating expenses and actual receipts will be based upon data from the most recently available complete data year as is the current practice.

NDE may have one-time computer programming expenses in 1997-98 to do reprogramming related to the change in certifying state aid. It is assumed any programming and workload increase related to the change in methodology for the initial certification of state aid can be handled with existing staff and resources of the agency.
